Hiring Manager,

JOB REFERENCE: DATA ANALYST

Dear Hiring Manager,

As a Data Analyst with a Bachelor's degree in Artificial Intelligence and Machine Learning, and experience in data analysis and dashboard development, the opportunity to contribute to your team is exciting.

In previous roles, expertise was demonstrated in conducting exploratory data analysis on e-commerce sales datasets, identifying key trends, and developing interactive dashboards for decision-makers. Notable projects include a Lang-Chain model for document interaction and a stock price prediction system.

Proficiency in Python, Pandas, Matplotlib, Seaborn, Power BI, SQL, and cloud technologies like AWS and GCP ensures a strong technical foundation.

Additionally, the ability to translate complex data insights into actionable recommendations for both technical and non-technical stakeholders adds value to any team.

Looking forward to discussing how these skills can align with the needs of your team. Thank you for considering the application.

Sincerely,

SUNNY VISHWAKARMA
